

BILCO Classic Series Basement Door

Painting Instructions

IMPORTANT: Doors supplied with a primer finish must be painted within forty-five (45) days of installation. BILCO requires the use of an All Surface Alkyd Base Enamel. For best results, carefully follow the directions on the paint label and apply one thin coat of paint followed by a second coat on both the exterior and interior primed steel surfaces of the door. Two quarts should be sufficient to coat the entire door.

Note: Bilco doors are also available with a factory applied powder coat paint finish to eliminate the need to finish coat the product.
